TECHNORAMA

Simply phenomenal!

For inquisitive minds

Technorama is one of the largest science centres in Europe. Its unique variety of experiments offers virtually infinite possibilities for experiencing the world of science in a thought-provoking and playful manner.

Unlike a museum, in a science centre you are encouraged to touch and play with objects. Natural phenomena need to be personally experienced. We do not learn to ride a bike by reading about it in books. Similarly, when we play with huge soap bubbles it is irrelevant how much we understand about physics. Active participation and our own personal experience are the keys to learning by doing.

Go with your gut feeling. Your natural instinct will take care of the rest as you let your curiosity, playfulness and joy in experimenting guide you.

See you soon at Technorama!

OUR WEEKEND TIP:

WinterthurSCIENCE – special offer

The special WinterthurSCIENCE offer provides children and adults visiting the Swiss Science Center Technorama with a **30% discount** on overnight stays.

Make a direct booking now at www.winterthur-tourismus.ch/science

The logo for Winterthur Switzerland, featuring a red stylized 'W' icon followed by the text 'winterthur' in red and 'switzerland' in black below it.

«Hands on!»

«Hands on» means exactly that for everything you will encounter at the Swiss Science Center Technorama – whether in the **main exhibition** with over 500 experiment stations or in the **temporary exhibition**, each of which lets you learn more about a fascinating topic. Spectacular **demonstrations** such as the lightning show amaze young and old alike.

In our laboratories we offer exciting **workshops** on topics from the fields of biology, chemistry or physics. Each of the 45-minute workshops is led by an expert in the subject. In our **OpenLabs** you can carry out simple experiments independently.

Our **AdventureRooms** offer the prospect of a thrilling experience. Within a given time slot, you are tasked with finding the way out of a locked room by solving puzzles related to natural phenomena.

Technorama's **park** (open from April to late October) is a great place to linger. You can discover the sundials and a wind machine that can produce hurricane-force blasts!

If you need to recharge your batteries after all these exciting experiences, why not visit the **self-service restaurant** or enjoy your packed lunch in our **picnic area** or open-air park? And for a very special souvenir, in the **Technorama shop** you will find a wide variety of interesting items to experiment on at home.

For more information, visit: **www.technorama.ch**

Our themed sections

The world of natural phenomena is huge – just like Technorama. You will hardly be able to see everything available on our four floors in the course of a day. To make it easier to plan your visit, we have therefore divided our exhibition into individual themed sections.

1

TOY TRAINS

Treasures from the largest collection of tinsplate toys and model trains in the world.

PREVIEW

Take a look behind the scenes and try out the prototypes of our new exhibits.

0

INVENTOR'S WORKSHOP

Become a designer and build a machine using everyday materials.

CURRENT AND MAGNETS

Unusual experiences with electrons and magnetic forces.

MECHANICUM

Get into the swing of things with gyroscopes, pendulums and springs.

LABS 1-4 / 7 (CHEMISTRY & PHYSICS)

Conduct your own experiments in our labs – professional support included!

LIGHTNING ARENA (DEMONSTRATION)

The most high-voltage demonstration of electricity you will ever see.

PARK

Discover exciting experiments under the trees and tranquil places in the open air.

1

MINDSCAPES

Don't trust your five senses!
Appearances can be deceptive.

MATHEMAGIC

Believe it or not – the fun begins
where maths starts!

TEMPORARY EXHIBITION

«Mirror, Mirror...» – from Easter 2019.

WATER, NATURE, CHAOS

Experience the beauty of nature from
its most fascinating and phenomenal side.

LABS 5–6 (BIOLOGY)

Conduct your own experiments in our
labs – professional support included!

GAS ARENA (DEMONSTRATION)

Experience gases – icy cold,
highly explosive and fiery!

2

ADVENTUREROOMS

Together with your team, solve scientific puzzles to find the exit within 60 minutes.

[Book additional tickets online or at the information desk.](#)

ET CETERA

An array of extraordinary experiments, games and interactive art works.

THE SOUND OF WOOD

Wooden machines to pedal and crank into action: irresistible fun with mechanics.

LIGHT AND SIGHT

Learn how light brings the world alive for us.

ORBITARIUM (DEMONSTRATION)

Our home planet from an astronaut's perspective.

All information and texts in the exhibition are available in English, German, French and Italian.
The whole exhibition is wheelchair accessible.

OPENING HOURS

Exhibition and labs: 10 am to 5 pm

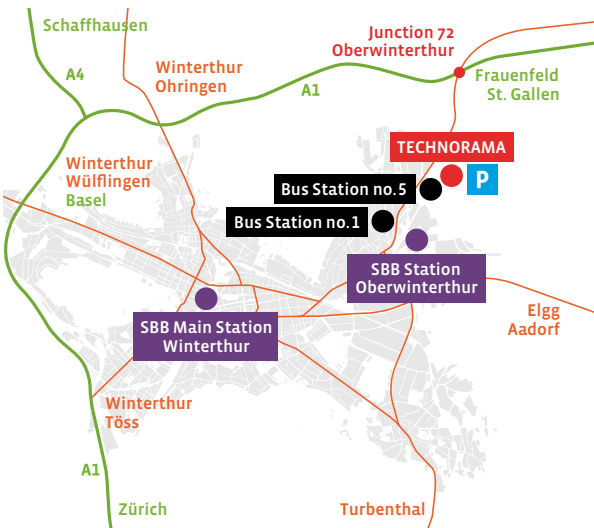

AdventureRooms: 8.30 am to 10.30 pm

Restaurant (self-service): 9 am to 6 pm

Open every day except for 25 December.
Remains open on other public holidays.

HOW TO GET HERE

Technorama is easily accessible by public transport
or by car. Free parking is available.
